

Latent heat is the heat loss as something melts or boils; or the heat gained as something condenses or freezes

when ice is melting...
It's not getting hotter.
Heat Energy is being
used to make the ice
melt (LATENT HEAT)

time (mins)	temp (°C)
0	-8°C
2	-4°C
4	-0°C
6	-0°C
8	2°C
10	6°C
